

## Table Boot

I have a very unequal floor in my cellar so placing a table is always challing because it is dancing between the 4 legs.

So that's why I created this compensation boot than can be applied to one leg to make the table stable.

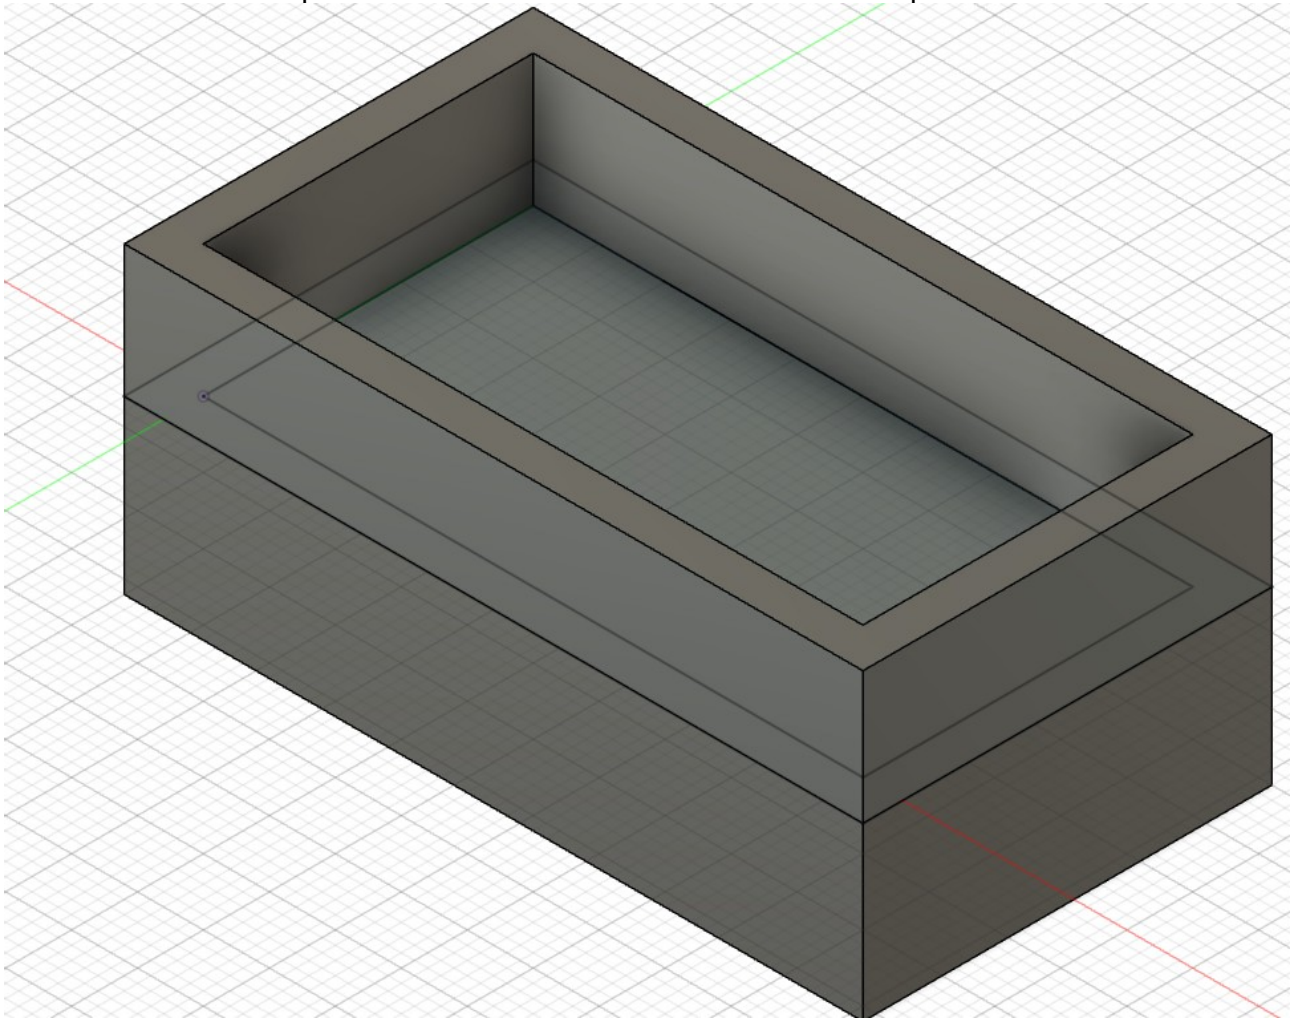

Compensation height: 13 mm

Size: 50 x 25

### 3D Descripton

I have extruded the shape 13 mm from the bottom and 10 mm in the top direction

**Table boot In use**
