

Camera mount

Back Side camera bracket

Figure 2 xS40 Bottom Dimensions

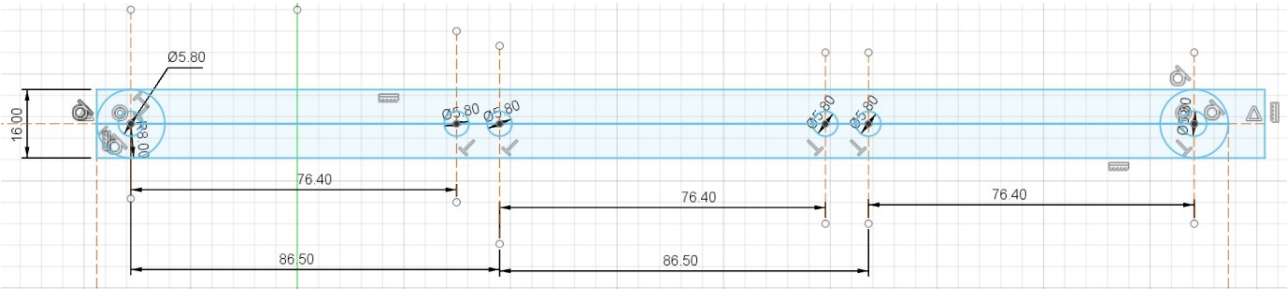

Mounting screws

4X M3 X 0.50 THD
X DEPTH 4.5 MM MAX

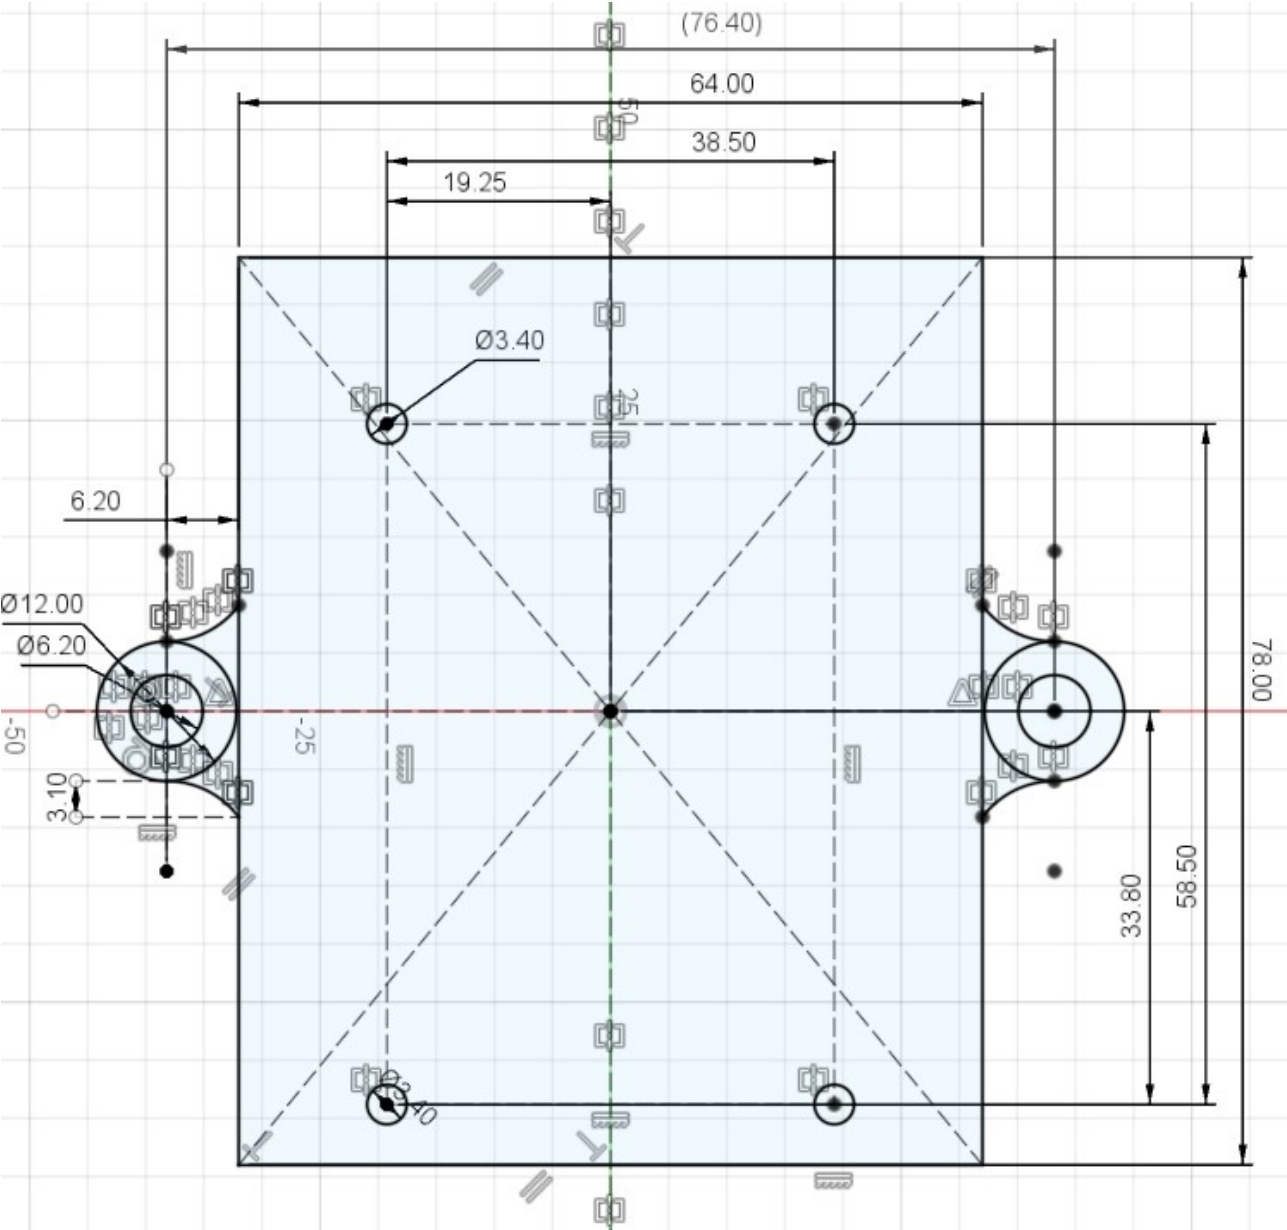

I set the thickness to 4 mm so I can use M3 x 8 mm and a washer.

Support Beam

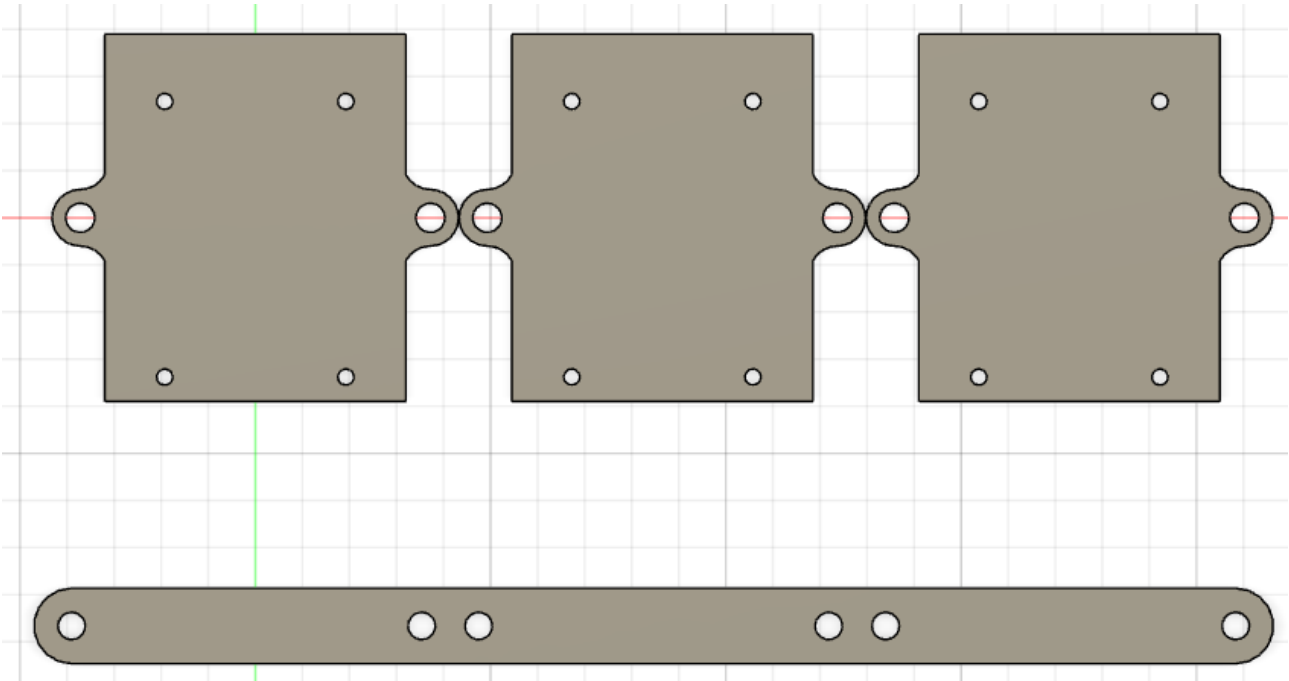

2 x 6 mm screws for each board

Camera Board

Top view

Final result

Possible improvements

Camera mount

Since the camera is rounded, so should be the camera mount. Having it squared makes it ugly

Beam and camera mount joint

The beam is 16 mm wide

The mounting fixture is 12 mm wide, hence this give an impression of mismatching
