

Kitchen Drawer Organizer

Version 1.0

Project Goals

I was sick of all my spoons and silverware moving around in the kitchen drawer, so I decided to create an physical barrier to replace the old ones that now are wearing out.

Side slot

This is a side pin that is used to match a slot in the kitchen drawer. This is critical to keep the organizer in place.

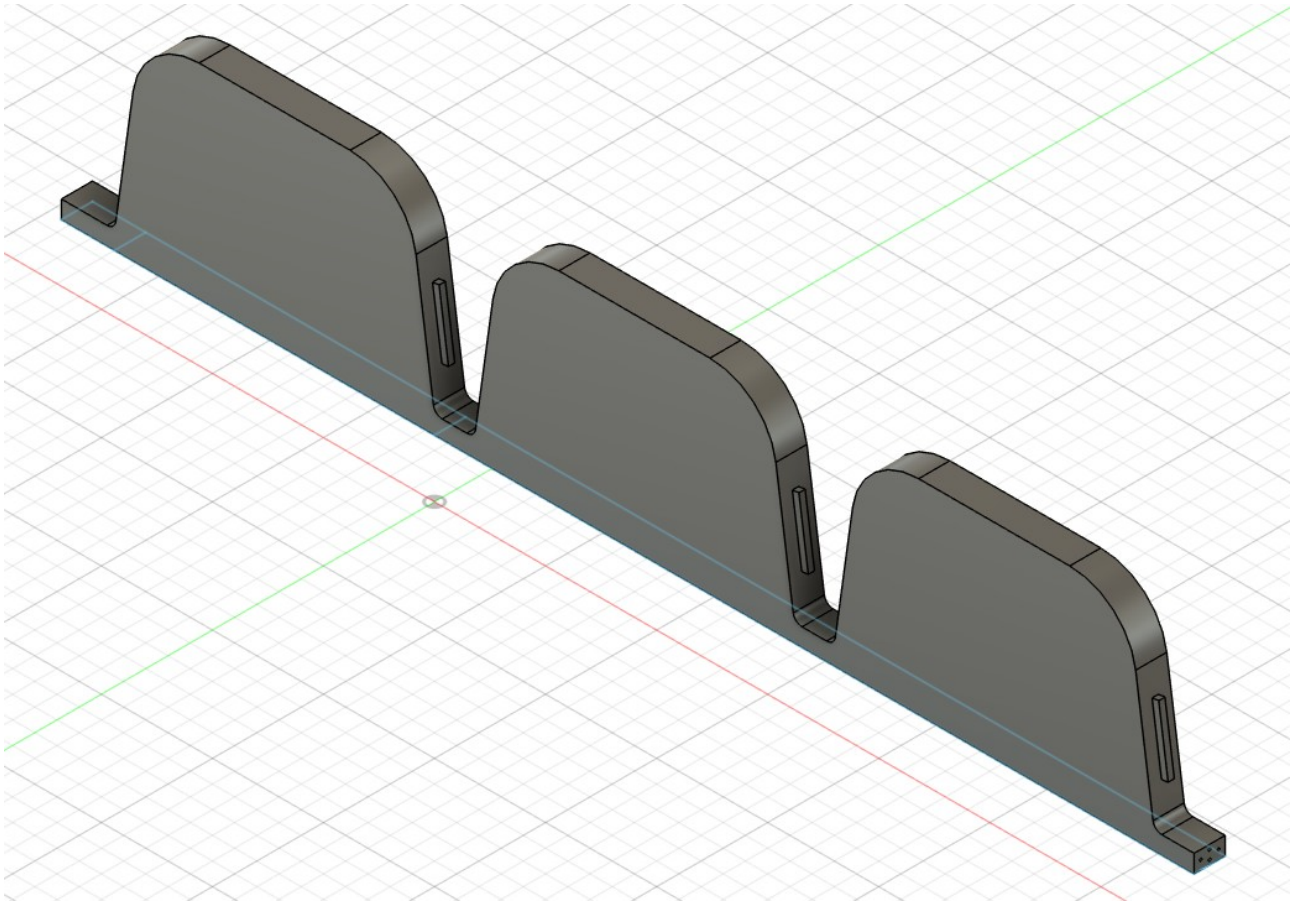

Reinforcement holes

To create a more rigid structure I add 4 holes in the top beam.
