

Project Goal

Create a set of parts that can be used to evaluate:

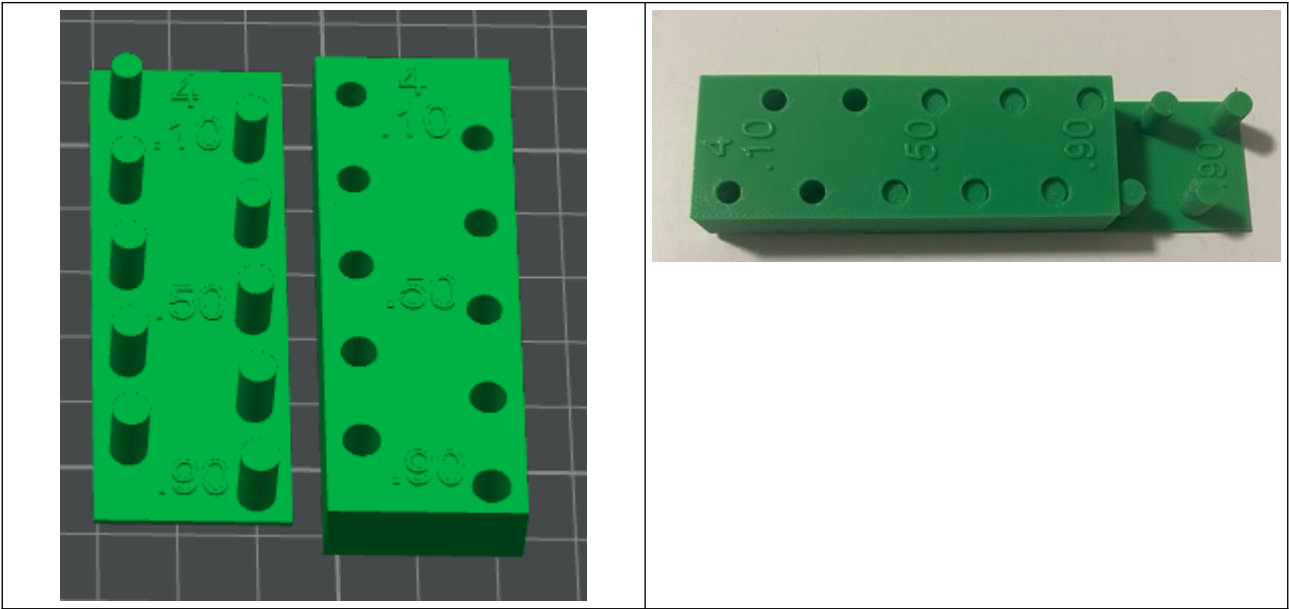

- Thickness: create reference samples for 1, 2, 3, 4, 5 mm
- Holes: create reference samples for 3, 4, 5, 6 mm for both holes and studs
- Dimensions: create a reference kit for 1, 2, 3, 4, 5, 10 mm

Holes

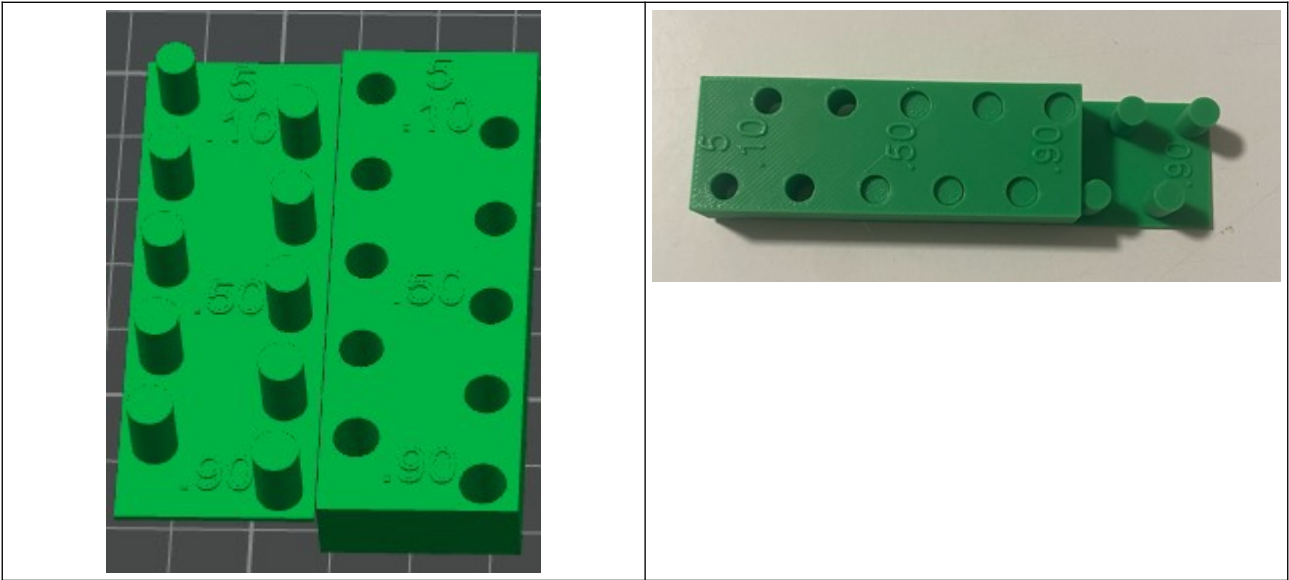

3 mm

4 mm

5 mm

6 mm

This is different since I need to create space using a 7 mm circular slot.
